# To help you find your path...

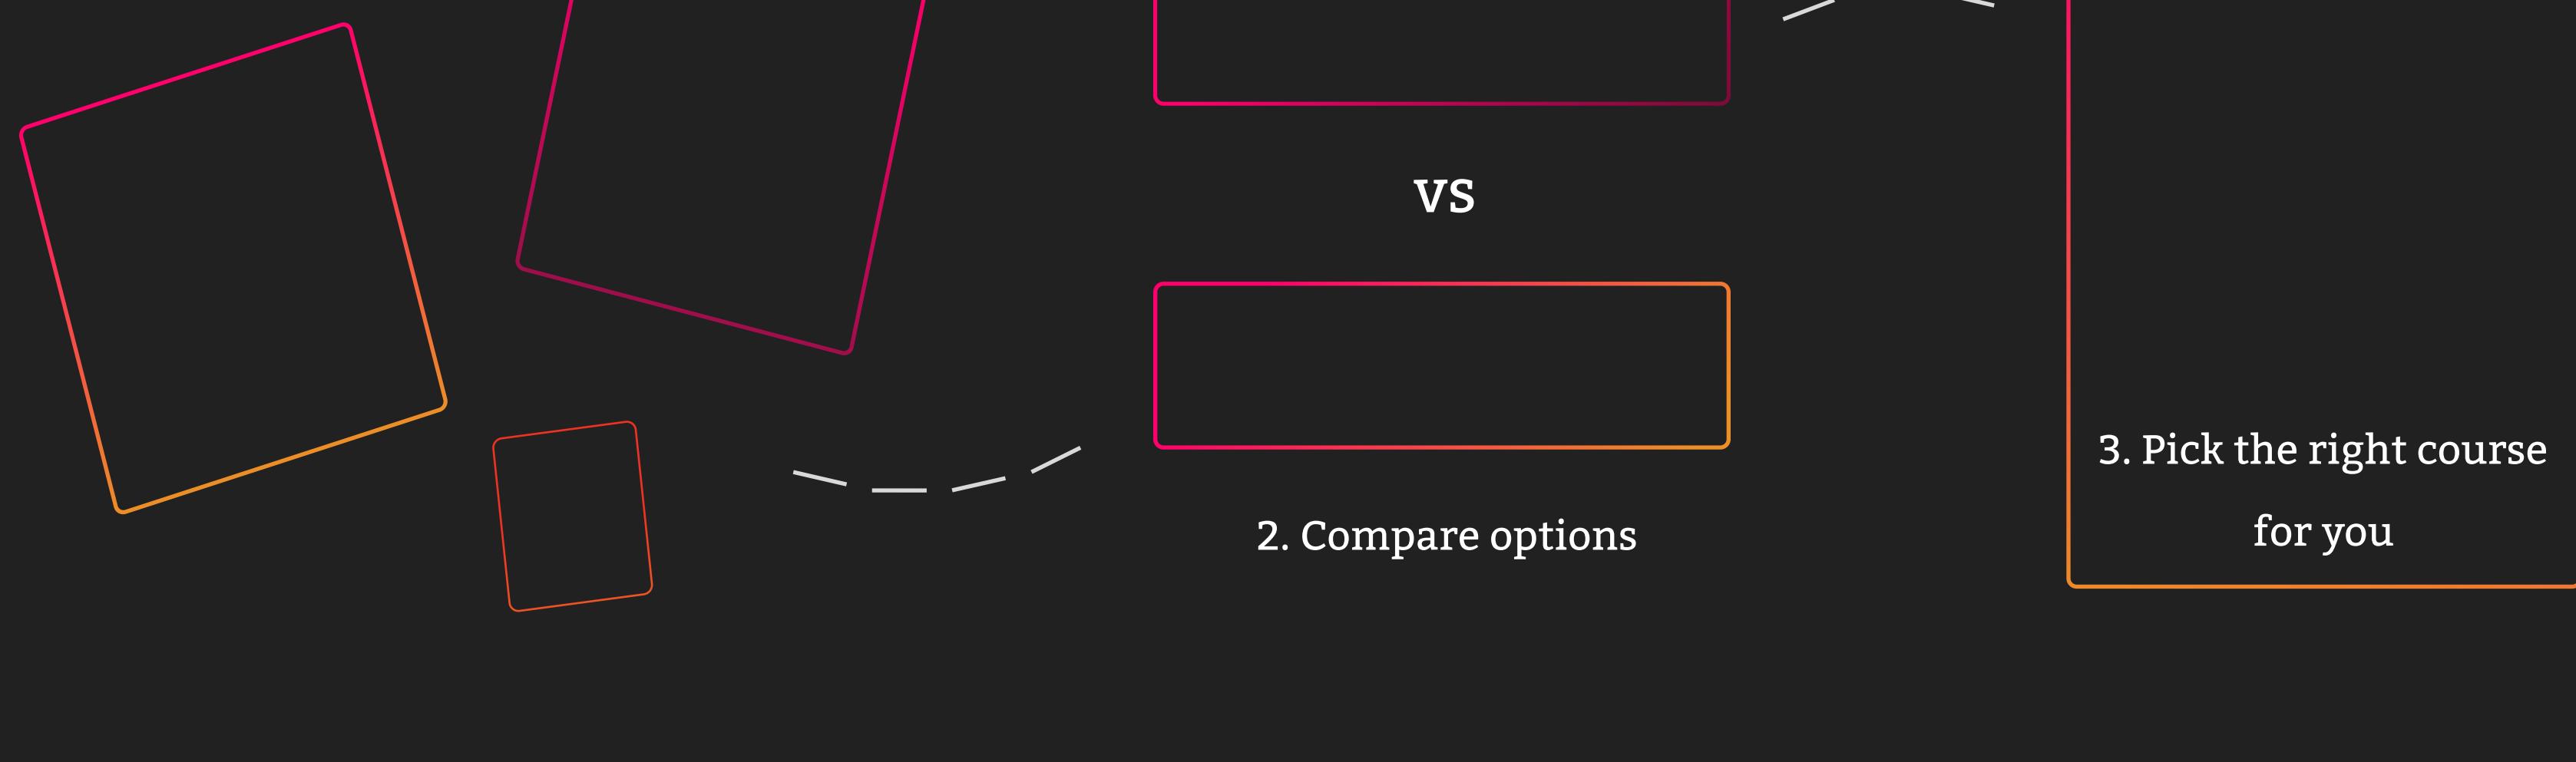

## Our Purpose

When picking a course it's normal to do a lot of research in order to pick the best course out there, to make worth the money, time and effort. That's where we come in. We are here to make your decision easier, doing the research for you and providing you the information.

## Our Experience

We've been in that position where you want to find the best course out there so you can finally hit that job you want so much, get a raise, make your own business, or maybe just to learn more about a subject. But you end up finding yourself stuck in the research wasting time, ending more confused than before, not sure what to do.

That is exactly why we came up with this idea to group the best Computer Science courses out there and research all their characteristics, program, price, fidelity, etc, and let you compare easily between your best options with a clear graphic of how those courses will be the best for your needs.
